PROFILE

Full-stack developer with 4+ years of professional experience building production web platforms end to end — from NestJS/Node.js APIs with PostgreSQL/Prisma to React and Next.js front ends. Currently building MultiVia, a geo-based parcel-to-tour assignment platform (NestJS, PostGIS, React, Flutter) at Multi Transport GmbH in Bremen. Experienced in SaaS products with subscriptions and payments (Stripe, iyzico), AI service integrations, role-based access control, multilingual applications and CI/CD on Vercel, Railway, Docker and VPS.

EDUCATION

B.Sc. Computer Engineering (taught in English)
Ankara University
09/2012 – 06/2017 | Ankara, Türkiye
GPA 3.21/4.0

INTERNSHIPS

Huawei, Software R&D Department
Software Development Intern
12/2017 – 02/2018 | Istanbul, Türkiye

Edit System ERP Systems
Software Development Intern
05/2017 – 06/2017 | Sakarya, Türkiye

PROFESSIONAL EXPERIENCE

Multi Transport GmbH
IT Specialist / Data Processing (Full-Stack Development)
11/2025 – present | Bremen, Germany

- Lead development of MultiVia, a platform that assigns scanned parcels to delivery tours: NestJS 12 API, React 19 admin and a Flutter scanner app (co-developed).
- Designed a PostgreSQL 17 + PostGIS data model (40 Prisma models) with a contract-first OpenAPI spec (183 operations) and a generated TypeScript client (Orval); shipped 49 versioned API releases in about four weeks.
- Built Excel import pipelines for real tour plans (2,666 route rules) and an OpenPLZ/OpenStreetMap integration that resolved 2,067 of 2,635 missing postcodes automatically, extending coverage to 8,171 German postcodes.
- Implemented a real-time scan feed (Server-Sent Events), offline-first mobile sync, page-level RBAC, an immutable audit log and a map-based admin (MapLibre, polygon zone editing); reduced on-device OCR trigger latency from 1.2 s to 350 ms.
- Built the company's driver-training LMS (Next.js 14, Prisma, PostgreSQL) with courses, videos, quizzes, certificates and analytics in TR/EN/DE.

Self-employed (project-based)
Freelance Full-Stack Developer
06/2023 – present | Remote

- NevaScholar (AI academic-writing SaaS): built most of the NestJS API (~184 endpoints) and the Next.js 15 app — Stripe subscriptions and credit wallet, Bull/Redis job queues with live progress via SSE/WebSocket, Google/Apple OAuth and TOTP 2FA.
- Albamedia, ALBA Studio (AI video production, NL): built the NestJS gateway (~90 endpoints, MongoDB, GCS) and the React 19 studio; integrated the Python AI engine (Veo 3, Gemini, ElevenLabs) via webhooks and Shotstack rendering.
- NDK Danışmanlık (therapy clinic platform, live since 2023): created booking, Ozan Pay payments and SMS notifications; led the re-platforming from Express/MySQL on a VPS to Supabase PostgreSQL + Prisma on Vercel (32 models, 181 endpoints, 27 migrations, row-level security).
- Kayıp ve Bulundu (lost & found platform): main author of all five repositories — NestJS API (~201 endpoints) with a weighted matching engine and iyzico payments; moved infrastructure from on-prem Docker Compose (Nginx, Prometheus/Grafana) to Vercel serverless.
- Persiy, EasyCRM, ZeroWasteGPT, Design Smile Turkey: delivered a multi-tenant SaaS with RBAC and subscriptions, a CRM, a CMS admin panel and a multilingual clinic website with automated VPS deployment and rollback.

Symmetric Holding
Team Lead, Full-Stack Developer
01/2025 – 08/2025 | Istanbul, Türkiye

- Led the full-stack development team of a crypto-exchange platform built on .NET Core, Node.js and Vue.js microservices.
- Worked on Redis caching and RabbitMQ messaging between services for trade and transaction flows.
- Maintained CI/CD pipelines in Azure DevOps and coordinated releases with QA and DevOps.
- Integrated B2B payment and liquidity providers and supported security reviews.

LANGUAGES

Turkish	*Native*
German	*Conversational*
English	*Fluent*
Spanish	*Basic*

SKILLS

Backend
Node.js • NestJS • Express • TypeScript • JavaScript • .NET Core (C#) • Fastify • PHP/Laravel • Python (FastAPI basics)

Frontend
React • Next.js • Vue.js • Redux Toolkit • Zustand • TanStack Query • Tailwind CSS • MUI • Ant Design • shadcn/ui • i18next / next-intl

Mobile
Flutter (Riverpod)

Databases & ORM
PostgreSQL • PostGIS • MySQL • MSSQL • MongoDB • Redis • Prisma • Sequelize • Knex • Supabase

Architecture & APIs
REST • OpenAPI/Swagger • microservices • multi-tenant SaaS • RBAC • SSE • WebSockets/Socket.IO • message queues (RabbitMQ, Bull)

DevOps & Cloud
Docker • GitHub Actions • Azure DevOps • Vercel • Railway • Nginx • PM2 • Linux VPS • Google Cloud Storage • AWS S3 • Cloudinary

Payments & Integrations
Stripe • iyzico • Ozan Pay • Firebase Auth • OAuth 2.0 (Google, Apple, Facebook) • TOTP 2FA • NetGSM SMS • Nodemailer

AI Integrations
OpenAI • Google Gemini / Veo 3 • ElevenLabs (service/webhook integration)

Testing
Jest • Vitest • Playwright • Supertest

Felixo Teknoloji ve Yazılım A.Ş.
Full-Stack Developer (Mid-level)
01/2024 – 01/2025 | Istanbul, Türkiye

- Developed backend and frontend features for a crypto-exchange platform (.NET Core, Node.js, Vue.js microservices).
- Upgraded and optimised .NET Core services; implemented Redis caching and RabbitMQ messaging.
- Implemented two-factor authentication (2FA) to strengthen account security.

Vartur Real Estate
Full-Stack Developer
07/2023 – 02/2024 | Istanbul, Türkiye

- Contributed to the migration to a microservices architecture (13 repositories) standardised with Docker and Prisma.
- Built the public real-estate portal (PHP/Laravel, Vue.js) and the admin dashboard (TypeScript, Vue.js, Prisma).
- Implemented RabbitMQ messaging and Redis caching for inter-service communication.

RAsoft Technologies
Full-Stack Developer
10/2022 – 07/2023 | Istanbul, Türkiye

- Developed a B2B catering management and ordering platform (React/Redux, Node.js/Express, PostgreSQL) with 81 REST endpoints and six user roles.
- Migrated coupons and orders from Mongoose/Sequelize to Prisma ORM on PostgreSQL.
- Integrated Stripe payments, real-time updates (Socket.IO) and Cloudinary media handling; built category, product, company and menu management.

PROJECTS

MultiVia – Parcel-to-Tour Platform
Multi Transport GmbH | 09/2026 – present
Shows warehouse staff instantly which delivery tour a scanned parcel belongs to; React admin with MapLibre zone editing, Flutter app with on-device OCR.

NevaScholar – AI Academic Writing SaaS
Freelance | 10/2025 – 05/2026 | nevascholar.com
SaaS with TipTap editor, Stripe subscriptions and a credit wallet; AI jobs via Bull/Redis queues with live progress over SSE and WebSockets.

ALBA Studio – AI Video Production
Albamedia (Netherlands), Freelance | 11/2025 – 01/2026 | albamedia.nl
Scene-by-scene AI video generation and voice-overs: NestJS gateway (MongoDB, Google Cloud Storage), React 19 studio, Shotstack rendering.

Kayıp ve Bulundu – Lost & Found Platform
RAsoft / Freelance | 06/2025 – 07/2026 | lostandfound.com.tr
Weighted matching of lost and found items by category, colour, brand and location; iyzico payments, OAuth, Redis caching and Leaflet maps.

NDK Danışmanlık – Therapy Clinic Platform
Freelance (via Infosim) | 06/2023 – present | ndkdanismanlik.com
Website, client portal and admin panel with appointment booking, therapist calendars, Ozan Pay payments and SMS/e-mail notifications.
